SKILLS

- Frontend: HTML, CSS, JavaScript, TypeScript, Modern Frameworks (React, Angular, Ember, Vue/Nuxt, Next.js)
- Backend: PostgreSQL, MongoDB, Bash, APIs, Microservices
- Tools: Git Version Control, Figma, Node.js, SaaS, Jenkins CI/CD, Adobe Creative Suite
- Misc: Java, Python
- Strong technical writing, time management, communication, organization, and collaboration skills.

PROFESSIONAL EXPERIENCE

Lingoport, Inc.

Boulder, Colorado

Software Engineer

January 2022 – Present

- Software Internationalization (i18n) Services:
 - As the lead i18n software engineer, I led internationalization remediation efforts (over several weeks- to months-long engagements) across several large-scale client enterprise applications containing millions of lines of code, identifying and refactoring thousands of localization issues and enabling global product readiness.
 - Organized and led teams of up to 8 other engineers to quickly adapt to various in-house programming styles and deployment pipelines to ensure a smooth and non-intrusive i18n implementation.
 - Created extensive technical documents, i18n code guidelines, and videos for client training purposes and trained new engineers on the Lingoport technology suite.
- Internal Product Development:
 - Developed, tested, documented, and promptly shipped internal product features supporting internationalization workflows used by enterprise clients.
 - Attended weekly standups, meticulously managed bugs, and collaborated closely with other members of the development team as needed.

Intern

May 2021 – December 2021

- Wrote, tested, and shipped custom Bash shell scripts in accordance with clientele requests.
- Researched, developed, and tested several web application prototypes to assist in the integration of external code management software with internal internationalization software.

Insights Intervention

Boulder, Colorado

Developer & Designer - React Native + Expo, Figma, Balsamiq

August 2020 – May 2021

- Collaborated with four other students using an agile development methodology to develop a new companion mobile application to provide useful information to parents, teachers, and kids.

PROJECTS

Figma Plugin - Lingoport Localizer

October 2022 – March 2023

Figma, HTML, CSS, JavaScript, TypeScript, REST API, Webpack

[Plugin](#) | [Demo](#)

- Designed, developed, and published a Figma plugin that connects with internal company software to allow users to translate their designs quickly and efficiently into different languages.
- Developed and implemented REST API integrations to automate design localization workflows.

EDUCATION

University of Colorado Boulder - Boulder, CO

August 2017 – December 2021

Major: Computer Science, Bachelor of Science

Minor: Creative Technology & Design
